

# Site Technician

Puchong, Selangor

<b>Department</b>	<b>Reports To</b>	<b>Full Time / Part Time</b>
Production	Senior Supervisor	Full Time

## Why this Role matters

The **Site Technician** is responsible for the installation, testing, commissioning, and maintenance of medium/low voltage switchgear systems at client locations. This role involves close collaboration with project engineers, clients, and contractors to support field operations by diagnosing technical issues, conducting functional testing, and ensuring projects are completed on time and to specification. Success in this position requires strong technical expertise, practical hands-on skills, and the ability to work independently in dynamic and sometimes challenging site environments.

## Where You'll Make an Impact - Key Responsibilities

- **Installation & Assembly** – Perform on-site installation and mechanical assembly of low voltage switchgear panels, busbars, and associated electrical components.
- **Testing & Commissioning** – Conduct electrical testing, functional checks, and assist in commissioning activities to verify correct operation of installed systems.
- **Troubleshooting** – Diagnose and resolve technical issues during installation or commissioning, escalating complex problems to engineering or technical support teams as needed.
- **Site Coordination** – Liaise with clients, contractors, and project teams to ensure site work progresses according to plan and safety standards.
- **Documentation & Reporting** – Maintain accurate records of installation, testing results, and service reports, ensuring timely submission of site documentation.
- **Compliance & Safety** – Adhere to all electrical safety standards, site protocols, and regulatory requirements to ensure safe working practices.
- **Preventive Maintenance** – Carry out periodic inspection and servicing of switchgear systems as part of preventive maintenance contracts.
- **Tool & Equipment Management** – Ensure proper use, maintenance, and calibration of testing instruments and hand tools used during site work.

## Are You the One? Here's What We're Looking For

- Certificate or Diploma in Electrical Engineering or related technical field.
- Minimum 2–3 years of experience in installation, testing, and servicing of low voltage switchgear or related electrical systems.
- Proficient in using electrical testing instruments (e.g., insulation testers, multimeters, continuity testers) and basic hand tools.
- Understanding of electrical drawings, wiring diagrams, and LV switchgear construction and operation.
- Ability to interact effectively with clients, site supervisors, and internal teams to ensure smooth coordination.
- Quick thinker with a practical approach to resolving field issues under time constraints.
- Willingness to travel frequently to project sites and work extended hours or weekends as required by project demands.

## Why Us?

At **SRS Power Engineering Sdn Bhd**, we believe that great careers are built where innovation meets dedication. Since our founding in 2002, we have established ourselves as one of Malaysia's leading specialists in medium and low voltage switchgear solutions, delivering safe, reliable, and smart power distribution systems. Guided by our vision to be at the forefront of switchgear technology, we are committed to providing exceptional value through innovation, quality, and service excellence.

Joining our organization means becoming part of a professional and collaborative environment where individual contributions are valued and play a vital role in our collective achievements. If you are ready to contribute your skills to a company shaping the future of power distribution, we invite you to explore your career with us and help us power tomorrow.

We offer a competitive salary, a comprehensive benefits package, and the opportunity to work alongside a dedicated and experienced team. If you have a background in switchgear and related fields, we'd love to hear from you!
