

Wiring Specialist

Puchong, Selangor

Department

Production

Reports To

Wiring Supervisor

Full Time / Part Time

Full Time

Why this Role matters

The **Wiring Specialist** plays a key role in the assembly and wiring of medium and low voltage switchboards. This position involves interpreting electrical schematics, wiring and terminating components, and conducting basic testing to ensure compliance with design specifications and industry standards. The role requires close coordination with engineering and quality control teams to maintain build accuracy and support on-time project delivery. Strong attention to detail, technical wiring skills, and a clear understanding of low voltage electrical systems are essential.

Where You'll Make an Impact - Key Responsibilities

- Read and understand wiring diagrams, schematics, and technical drawings to accurately wire low voltage switchboards according to design specifications.
- Perform precise wiring, crimping, stripping, and termination of cables and conductors within switchboard panels, ensuring correct routing and secure connections.
- Ensure all wiring and assembly work complies with relevant electrical standards, safety regulations, and customer specifications.
- Conduct basic electrical tests such as continuity checks and insulation resistance tests to verify wiring accuracy and functionality prior to quality control testing.
- Identify and correct wiring errors or faults during the build or test phases, working collaboratively with engineers or supervisors when needed.
- Assemble and fit-out switchboard enclosures, including installation of mounting rails, cable trays, and labelling of terminals and components.
- Maintain clear records of wiring changes, test results, and any modifications made to the original design. Ensure proper labelling and documentation for future reference.
- Always adhere to company safety policies and procedures. Keep the work area clean, organized, and free from electrical hazards.

- Work efficiently to meet production deadlines, quality standards, and delivery targets as set by supervisors.

Are You the One? Here's What We're Looking For

- Minimum requirement: Wireman Certificate PW1, PW2, or PW3
- Must be willing to work Overtime, if required
- Proficiency in using hand and power tools, and crimping equipment
- Ability to interpret technical documents, and SLD.
- Ability to work accurately and meticulously, ensuring proper connections and installations.
- Ability to identify and resolve electrical issues and defects.
- Ability to perform repetitive tasks and work with small components.

Why Us?

At **SRS Power Engineering Sdn Bhd**, we believe that great careers are built where innovation meets dedication. Since our founding in 2002, we have established ourselves as one of Malaysia's leading specialists in medium and low voltage switchgear solutions, delivering safe, reliable, and smart power distribution systems. Guided by our vision to be at the forefront of switchgear technology, we are committed to providing exceptional value through innovation, quality, and service excellence.

Joining our organization means becoming part of a professional and collaborative environment where individual contributions are valued and play a vital role in our collective achievements. We offer opportunities to apply proven industry know-how, collaborate with seasoned experts, and engage in challenging projects that will expand your professional capabilities. If you are ready to contribute your skills to a company shaping the future of power distribution, we invite you to explore your career with us and help us power tomorrow.

We offer a competitive salary, a comprehensive benefits package, and the opportunity to work alongside a dedicated and experienced team. If you have a background in switchgear and related fields, we'd love to hear from you!
